Who am I?

I'm a senior developer with 4 years of hands-on experience building full-stack projects from the ground up. I'm passionate about learning new technologies and thrive on the challenge of creating innovative solutions. Whether it's designing intuitive user interfaces or developing back-end systems, I enjoy bringing ideas to life and constantly pushing my skills to the next level.

Projects

[Debbol.com](#)

An eCommerce platform I developed, leveraging Next.js/React for seamless user experiences, TypeScript for scalable, maintainable code, and Prisma and Postgres for database management. The platform integrates secure Stripe payments and utilizes server-side rendering for enhanced performance. Designed to handle global transactions and provide a smooth, reliable shopping experience for users worldwide.

[DebolMarket.com](#)

another eCommerce platform I developed, using Firebase for real-time database management and authentication, and Stripe for secure payment processing. The platform is designed to handle global transactions, offering a fast and seamless shopping experience. It leverages cloud functions and scalable infrastructure to ensure reliable performance and smooth operations for users around the world.

[Times Business Group](#)

A business site I built for a private client to showcase their products and services. The site features a modern design that highlights the brand's offerings, including an engaging portfolio, effectively communicating the client's unique value to potential customers.

Education

2022 - 2025

St. Mary's University

Bachelor of Science In Computer Science

Skills

- Strong problem-solving abilities
- Fast learner with a passion for new technologies
- Detail-oriented and focused on code quality
- Excellent communication and collaboration skills
- Self-motivated and able to work independently
- Creative thinker with an innovative mindset
- Strong work ethic and dedication to project success
- Ability to handle complex challenges with a positive attitude
- Organized and capable of managing multiple tasks efficiently

Some technologies I used
